INTRODUCTION

2020 4th International Conference on Computational Biology and Bioinformatics (ICCB 2020) will be held in Bali, Indonesia during December 27-29, 2020. The aim of ICCB 2020 is to present the latest research and results of scientists related to Computational Biology and Bioinformatics. This conference provides opportunities for the different areas delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration. We hope that the conference results constituted significant contribution to the knowledge in these up to date scientific field.

KEYNOTE SPEAKER

Prof. Sung Wing Kin
National University of
Singapore, Singapore

IMPORTANT DATES

Paper Submission: Before Oct. 15, 2020

PUBLICATION

ACM Conference Proceedings (ISBN: 978-1-4503-8844-3) : archived in ACM Digital Library, indexed by **Ei Compindex** and **Scopus**, and submitted to be reviewed by Thomson Reuters Conference Proceedings Citation Index (ISI Web of Science).

Some excellent papers will be recommended to the topic-related journal.

CALL FOR PAPERS

Topics of interest for submission include, but are not limited to: Imaging, instrumentation and sensors for model generation and identification

- Experimental methods for models validation
- Information Technology applications to computational bioengineering.....

Applications to diagnosis, prognosis, treatment, monitoring and rehabilitation

- Data management and modelling tools
- Emerging numerical methods and computational tools.....

High-performance computational systems biology and parallel implementations

- Inference from high-throughput experimental data
- Model integration from biological databases.....
