

Politecnico
di Bari

IL RETTORE

Dear Colleagues,

We are glad and honored that you will be joining us in Italy the 2nd International Conference on Computational Biology and Bioinformatics, which will be held on 11-13 October 2018, in Bari.

Bari, balcony overlooking the Mediterranean and cultural crossroads since ancient times, is an international center that slickly blends business, culture, science, and technology.

The conference takes place in one of the most prestigious Italian universities, scientifically fruitful, the Bari Polytechnic.

The "Conference on Computational Biology and Bioinformatics" has specific aim to treat to promote concepts and advanced hardware and software technologies in bioinformatics, systems biology and computational methods for molecular biology. Computational methods covered in the conference include numeric simulation, machine learning, pattern recognition, knowledge representation, databases, combinatorial optimization, stochastic modeling, string and graph algorithms, computer linguistics, robotics, constraint satisfaction and parallel computation.

The main scope of the conference is to strengthen the interdisciplinary character between medical, bio-scientist and technical researchers and practitioners, within the generous setting of medical bioengineering and bioinformatics.

In the belief that bioengineering, and bioinformatics can in the near future revolutionize medical practice and improve biological knowledge, We hereby warmly invite you all to share the results of your scientific research.

Professor Eugenio Di Sciascio

Polytechnic University of Bari Rector

ICCB 2018 General Chair
